

SENKO Opens "Tachikawa Logistics Center in the Western Tokyo Area Expanding Electronic Commerce and Drug Store Logistics Business

Senko Co., Ltd. (President: Yasuhisa Fukuda; "Senko") will open the "Tachikawa Logistics Center" ("the new center") within "MFLP TachikawaTachihi" (Tachikawa City, Tokyo) on July 1.

The new center is conveniently located approximately 7 km, or around 15 minutes by car, from the "Kunitachi-Fuchu IC" on the Chuo Expressway. This area in western Tokyo has a population of some 4.3 million people, and the center is ideal for commuting being within walking distance of "Tachihi Station" on the Tama Toshi Monorail Line. There are also commercial facilities like nursery schools and a large shopping mall around the station, making it a pleasant area to work in.

The new center will be used for product storage and sorting work for major internet shopping retailers and other customers. With six locations around Japan including SENKO's existing business sites for logistics, it will play a role in strengthening logistics systems for electronic commerce that is slated to increase in demand even further.

SENKO previously opened the "Hino Logistics Center" (Hino City, Tokyo) to serve a major drug store chain in 2017, however with greater demand for product storage, sorting and store deliveries following an increase in that chain's business and store expansions, both the Hino and Tachikawa logistics centers will cover the required operations. The new business site will also further boost the foundation for operations in the western Tokyo area.

As a corporate group supporting people in their daily lives, opening the new center will also serve as an opportunity to expand the logistics business for electronic commerce and drug stores that is expected to grow in the future.

<Tachikawa Logistics Center overview>
