

# Strengthened logistic services for imported products in Narita area

- Launched Narita Fashion Logistics Center II -

TOKYO NOHIN DAIKO Co., Ltd. (*TOKYO NOHIN DAIKO*) in the SENKO Group has launched “Narita Fashion Logistics Center II (*Narita FLC II*)” in Tomisato, Chiba on May 11, 2016.

Serving as a core member of SENKO Group in the fashion logistics business, TOKYO NOHIN DAIKO has developed a business dedicated to apparel logistics, winning major customers including apparel manufacturers and department stores. This newly-launched Narita FLCII is a large-scale fashion logistics center, 4 stories high above the ground and with gross floor area of 40,900 m<sup>2</sup>.

As many of brand products imported by TOKYO NOHIN DAIKO’s customers are shipped by air, and the needs for the inland area as a business location is high from the perspective of BCP (Business Continuity Plan), TOKYO NOHIN DAIKO positions Narita area as a logistics hub for imported brands and has launched “Narita Fashion Logistics Center I (*Narita FLC I*)” in May last year in the vicinity of the new center.

With this launch of Narita FLC II, a logistics hub with total gross floor area of 120,000 m<sup>2</sup> is developed together with Narita FLC I and the existing “Narita Center” (Tako-machi, Chiba), which is located within a 30-minute distance by car from Narita International Airport.

Narita FLC II with a bonded warehouse can shorten the time-to-market, or lead time by taking advantage of its location adjacent to the international airport, and like Narita FLC I, provide a consistent service from quality management service including product inspection and care labelling, to storage and delivery.

In addition, hazardous material storage area and licensed cosmetics and quasi-drugs manufacturer area are available to respond to various needs from customers. As TOKYO NOHIN DAIKO deals in high-end brand products, it takes all possible security measures including entry/exit management using an IC card and manned security.
